

ImagePlus- Part of the Advantage Platform

True Hybrid Backup: Store Your Image Locally While Backing Up Critical Files and Databases to the Cloud

Features:

- Bare Metal Restore (BMR)
- No Appliance or Hardware to Purchase
- No Additional Cost for Onsite Image Creation and Storage
- Restore From USB or Network Drive
- Restore to the Same or Dissimilar Hardware
- Dramatically Reduce Recovery Time With Local Image Backup

To assist businesses in solving the longstanding issue of identifying a cost effective solution for backup and disaster recovery, LiveVault has added a powerful new feature to its industry-leading cloud backup product.

Supported Platforms

	Server	Desktop
Windows Server 2012 R2 x64	✓	✓
Windows Server 2012 x64	✓	✓
Windows Server 2008 R2 x64	✓	✓
Windows 8 and 8.1	✓	✓
Windows 7	✓	✓

The LiveVault Advantage product with ImagePlus is a true hybrid solution. By combining on-site image with offsite backup customers can eliminate traditional imaging costs and only pay for the critical data which is sent offsite.

Advantage with ImagePlus shortens backup windows. Instead of sending a large image offsite customers can save an image locally while sending less information to the LiveVault data centers. Best of all, **it is included at no additional charge** with your cloud backup subscription.
